needs of an Employee in an Organization

Integrated Tracking System

About SSI

Supreme Soft, Inc. (SSI), headquartered in Vienna, Virginia, is a global information technology solutions company that provides IT Services, Product Engineering and Business Process Outsourcing Services to technology providers and enterprises globally.

At SSI, we have a deep understanding and appreciation of the dynamic nature of enterprise IT infrastructures that are taxed with providing timely services while realizing the full potential of their investments in technology. Since 1995 we have been helping our clients achieve results by identifying mission-critical challenges and implementing innovative customized solutions to increase profits, maximize productivity, reduce costs and increase reliability.

SSI has been experiencing double digit growth since its inception and is recognized as one of the fastest growing technology companies in the Washington, D.C., metropolitan area to provide offshore and outsourcing services. More aptly, there are three good reasons: **Our People, Our Approach and Our Delivery Model.**

Product Overview

Today, we are well and truly global citizens. Expanding businesses and loosening visa regimes have created a workforce without borders. Business concerns are driving many executives across nations. This often creates a problem for the officials within the organizations handling information pertaining to immigrants.

SSI's Integrated Tracking System provides ease of functioning to these officials. A storehouse for information on foreign employees to an organization, **ITS** integrates all the information on the individual in separate modules called Immigration module, HR module and Accounting module and thus minimizing the waiting time from other departments on information.

Benefits

- A boon for Human Resources Department of any Organization which has frequent onsite consultants
- A Single Source of Information for all Employee Details
- An Easy and Time Saving Solution for Information Access for Federal Agencies
- Classified into three Modules to meet the Demands of different Departments
- Each of these Modules is exclusive of each other yet they facilitate easy access to data

Modules

Immigration

- Maintain up-to date Information on Employee's Immigration Details
- Reminders to File Paperwork with Local & Federal Government on an Employee Basis
- Easy Public Access of Information regarding Employees under the Compliance of Federal Regulation

HR

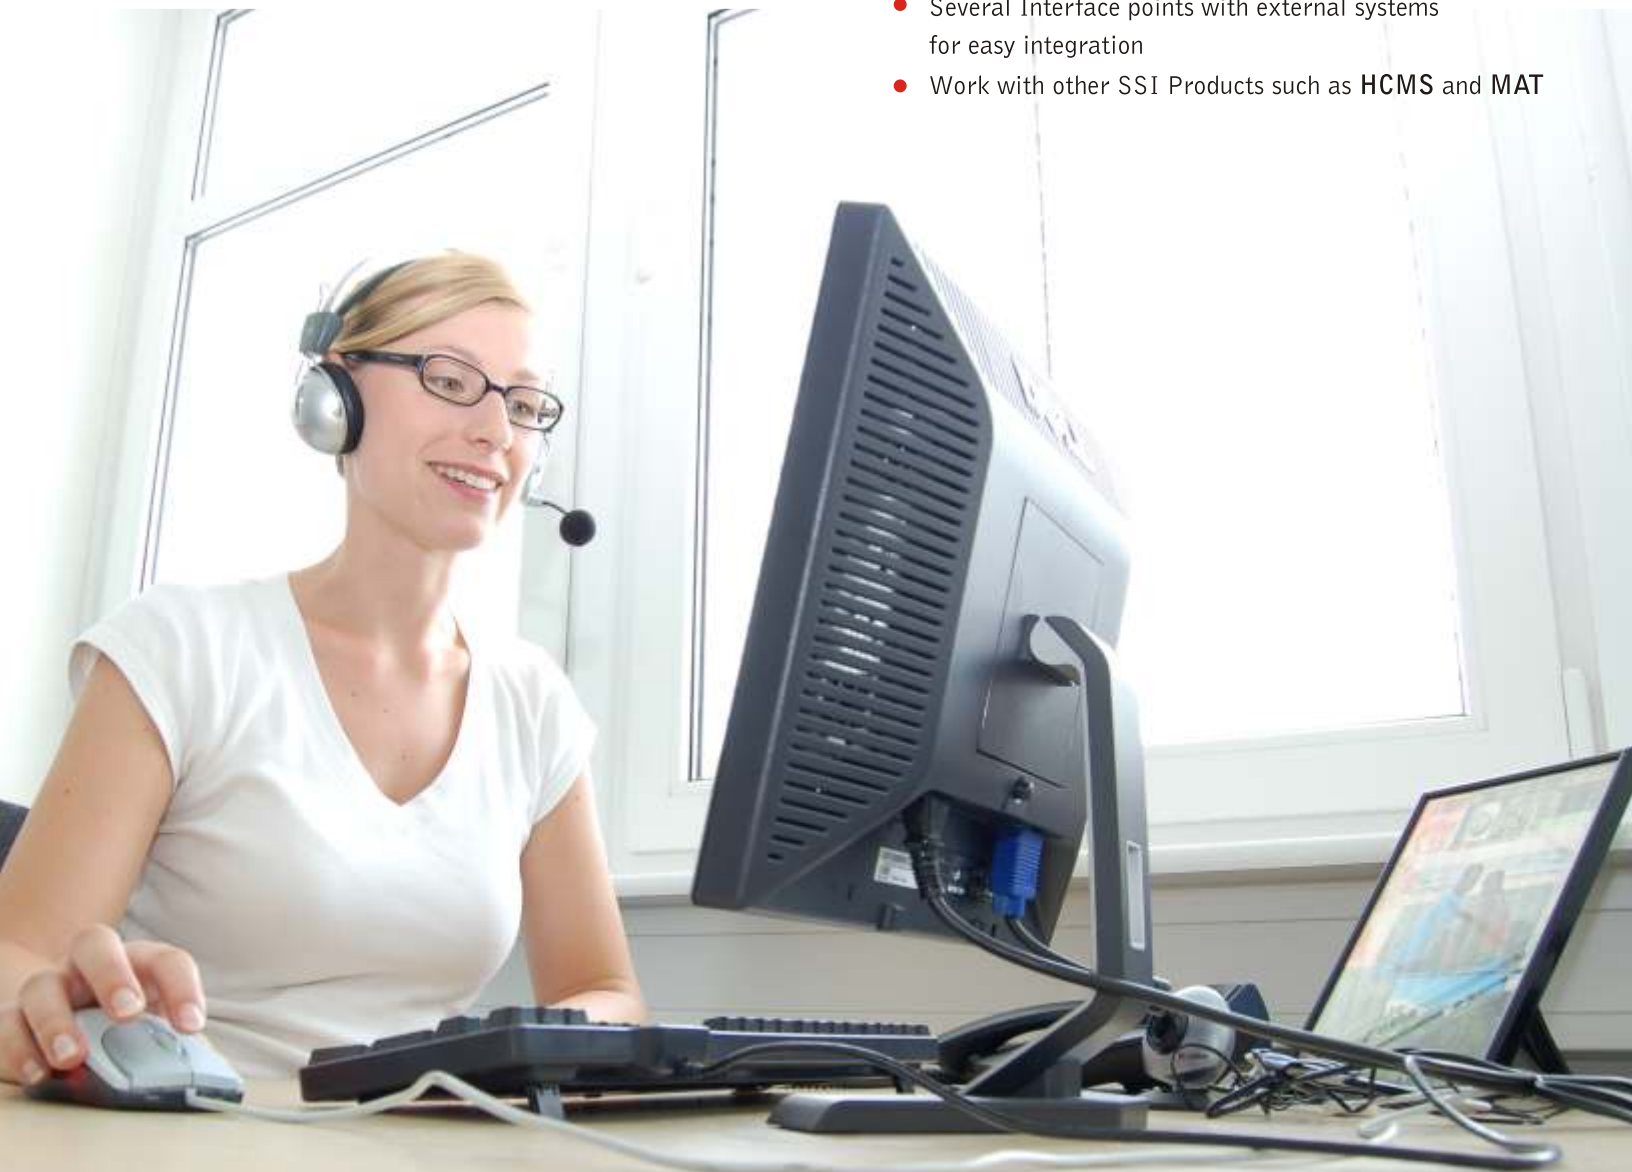

- Historical Information of Employee from the date of Employment
- Easier Employee Appraisal Process
- Notification of Announcements to all Employees
- Quicker Access to the Client Information and Contact details

Accounting

- Maintenance of Salary Information
- Easier Calculation of Sick Leave, Overtime & Holidays
- Issuance of Reimbursements on a single click

Design Highlights

- Modular design that gives the flexibility to have each module work independently
- Scalable platform
- Extensive use of AJAX Technology for rich User Experience
- Highly configurable User Interface based on User Preferences
- Several Interface points with external systems for easy integration
- Work with other SSI Products such as **HCMS** and **MAT**
