

MAT
Mobile Analytics Tracker

Stay in touch while on the go

Supremesoft
Thoughts Delivered.

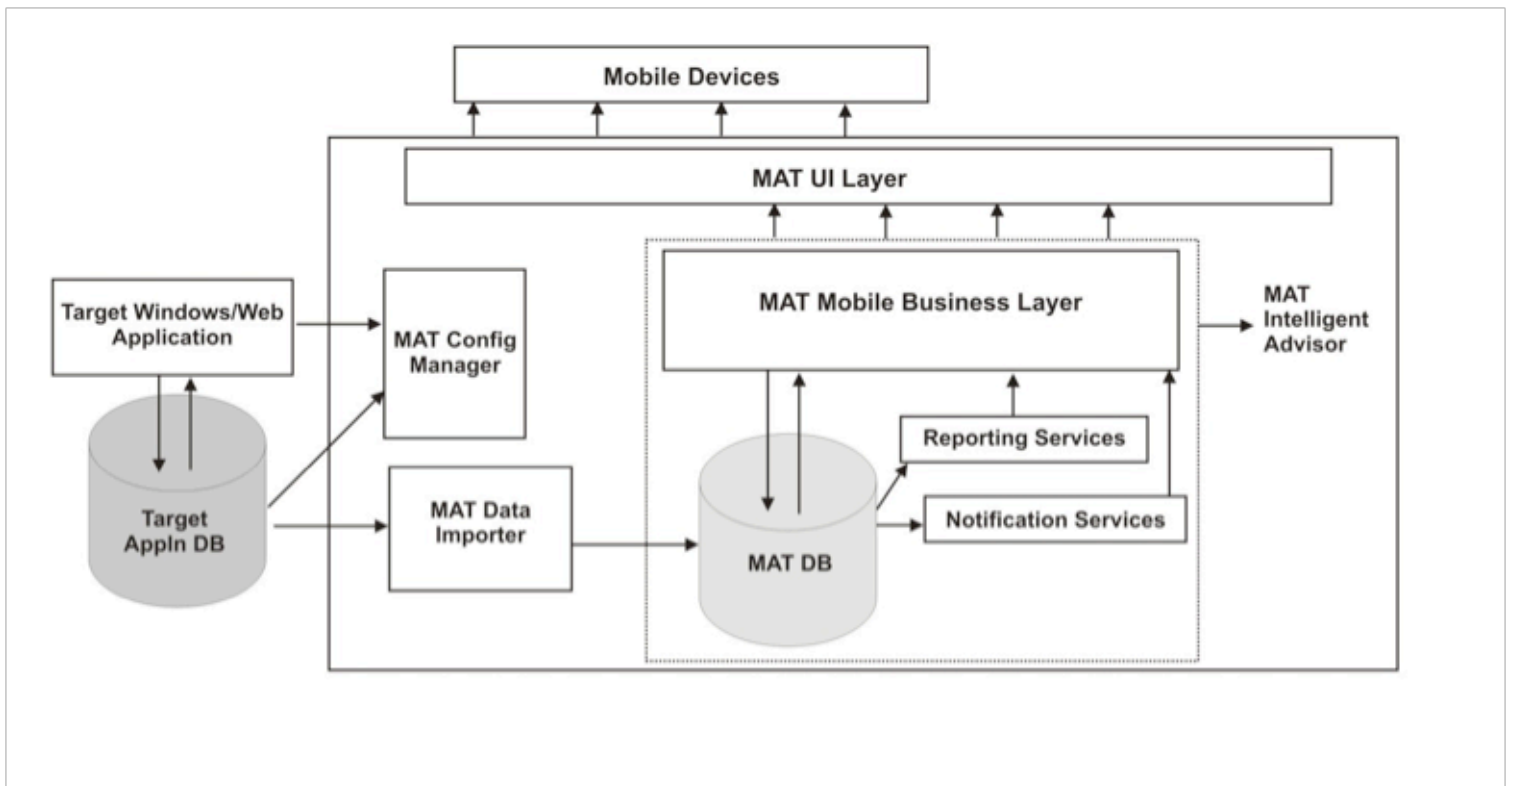

Supremesoft offers wireless and PDA services that is hassle-free so one can continue to work away from the office. For any enterprise users, Offline Client Synchronization allows employees to work offline and automatically update the employees when they return to the network. Supremesoft mobile solutions translate to less downtime and greater productivity.

Supremesoft Mobile Solutions creates mobile software for businesses. Whether through enabling business processes or creating a new mobile product for our customers, our ultimate goal is to help our customers successfully deploy mobile solutions that strengthen their business.

We have many years of experience delivering and supporting mobile solutions. Our expertise includes mobile software development and mobile product marketing. Through unique relationships with wireless carriers and mobile hardware and software partners we enable our customers to not only create mobile solutions but also take them to market.

Our Integration module will integrate the mobile application with the target system/application through a User Interface driven module. The biggest advantage of Supremesoft mobile solution is being its adaptability to integrate with any type of business application like Finance, Health and Insurance

Supremesoft mobile solutions main goal is to provide reporting on the go. These are several types of Reports that can be created using the solutions User Interface so easily in very less period. Apart from the default inbuilt Alert and Notification that Supremesoft's Mobile Solution provides, it lets you choose what you need to be notified of. Apart from the regular Alert rules, you will be able to create what we call 'Intelligent Rules' which can be created by providing complex conditions.

Mobile Analytics Tracker (MAT), a mobile enabled website technology that allows users to access information in their palm literally. This plug and play software is hosted in the server and allows users to connect to the source database and access the information from anywhere. This is a must have technology for organizations that have their decision makers always on the go.
