About SSI

Supreme Soft, Inc. (**SSI**), headquartered in Vienna, Virginia, is a global information technology solutions company that provides IT Services, Product Engineering and Business Process Outsourcing Services to technology providers and enterprises globally.

At **SSI**, we have a deep understanding and appreciation of the dynamic nature of enterprise IT infrastructures that are taxed with providing timely services while realizing the full potential of their investments in technology. Since 1995 we have been helping our clients achieve results by identifying mission-critical challenges and implementing innovative customized solutions to increase profits, maximize productivity, reduce costs and increase reliability.

SSI has been experiencing double digit growth since its inception and is recognized as one of the fastest growing technology companies in the Washington, D.C., metropolitan area to provide offshore and outsourcing services. More aptly, there are three good reasons: **Our People, Our Approach and Our Delivery Model.**

Mobile Analytics Tracker

Product Overview

Extension of enterprise application to mobile worker is compelling for many businesses, as enterprise level software provides the basic business level functionality for an organization. This technology has generated tremendous interest among many organizations with its huge potential to cut costs by providing information on their palms literally.

SSI has assisted numerous clients with implementation of **Mobile Analytics Tracker** (**MAT**), a mobile enabled website technology that allows users to access information in their palm literally. This plug and play software is hosted in the server and allows users to connect to the source database and access the information from anywhere. This is a must have technology for organizations that have their decision makers always on the go.

Basic features

- ◆ One-Click Configuration of MAT to all Legacy Applications
- ◆ User Definition & Customization of Analytic graphs
- ◆ Live Updates to data changes
- ◆ Subscription of Alerts and Notifications for Mission Critical Activities

Architecture

- ◆ Modular design that gives the flexibility to have each modules work independently
- ◆ SOA Based
- ◆ Easy integration with existing application
- ◆ Scalable platform
- ◆ Works on WAP as well as TCP/IP
- ◆ Support several different databases

Compatibility

- ◆ Blackberry OS
- ◆ Symbian OS
- ◆ Windows Mobile 5 & 6
- ◆ Palm OS

Benefits of MAT

- ▶ Mobility – Access to data Anywhere Anytime
- ▶ Custom Report Generation
- ▶ Easy to use
- ▶ Plug and Play with any system
- ▶ Text to Voice capability
- ▶ Virtually connected to people across the globe
